Airline Operations Solutions

## Lido FMS

NavigationData Services

**Lido FMS creates value**

- Time and cost efficiency: One partner for data, service and support
- Security: Continuous Internet access to customized information
- Reliable data: Complete aeronautical data coverage
- Worldwide service: 24h/7d expert service line for immediate help

Precise in-flight navigation is essential for flight safety – and cost control. More than 100 airlines worldwide successfully use the Lido Flight Management System (FMS) database.

FMS supplies comprehensive navigation data for cockpit systems and contains important route information including data pertinent to altitude and alternate airports. On the one hand, the FMS database provides all relevant information for the complex functioning of the autopilot and the guidance of the aircraft through the entire flight. On the other hand, the database also contains helpful specifications relating to, for example, the engine. This leads to fuel savings.

The Lido FMS Navigation Database Service (Lido FMS NavDB Service) provides the highest level of quality data that is maintained at the most exacting standards of accuracy and integrity in compliance with

the standards described in EUROCAE ED-76/RTCA DO-200A. The production processes have been certified by EASA (European Aviation Safety Agency – LoA Type) and audited successfully by major airlines operating with NavDBs from Lufthansa Systems.

The source from which the Lido FMS database is extracted is the Aeronautical Information Publication (AIP) of every country, published monthly by the respective civil aviation authorities. A complete aeronautical coverage consisting of all elements needed in aviation today has been included in the FMS database, covering, but not limited to, airport information, airways, terminal and enroute waypoints, nav aids, holding and approach procedures, etc. This data, combined with information such as that pertaining to company routes and individual procedures, results in a specific database tailored to each customer's requirements.

## Product Introduction

An aeronautical database consolidates and makes available all relevant navigational data, airway structures and flight procedures for flight operations. Its main use is as a processed FMS database file that delivers the necessary data input to an aircraft's flight management system during flight. Besides the data's use in the aircraft, the content is also used for operations of flight simulators and for flight planning tools.

## Product Description

The EASA-certified navigation database supports nearly all FMS system types and covers all published commercial airports, Airfields, Helipads (+22'000). The customer base of more than 160 airlines includes LH, LX, BA, AF, EK, TG. And various flight planning and sim. operators

Airline Operations Solutions

## Lido FMS

NavigationData Services

**Lido FMS creates value**

- Time and cost efficiency: One partner for data, service and support
- Security: Continuous Internet access to customized information
- Reliable data: Complete aeronautical data coverage
- Worldwide service: 24h/7d expert service line for immediate help

Precise in-flight navigation is essential for flight safety – and cost control. More than 100 airlines worldwide successfully use the Lido Flight Management System (FMS) database.

FMS supplies comprehensive navigation data for cockpit systems and contains important route information including data pertinent to altitude and alternate airports. On the one hand, the FMS database provides all relevant information for the complex functioning of the autopilot and the guidance of the aircraft through the entire flight. On the other hand, the database also contains helpful specifications relating to, for example, the engine. This leads to fuel savings.

The Lido FMS Navigation Database Service (Lido FMS NavDB Service) provides the highest level of quality data that is maintained at the most exacting standards of accuracy and integrity in compliance with

the standards described in EUROCAE ED-76/RTCA DO-200A. The production processes have been certified by EASA (European Aviation Safety Agency – LoA Type) and audited successfully by major airlines operating with NavDBs from Lufthansa Systems.

The source from which the Lido FMS data base is extracted is the Aeronautical Information Publication (AIP) of every country, published monthly by the respective civil aviation authorities. A complete aeronautical coverage consisting of all elements needed in aviation today has been included in the FMS database, covering, but not limited to, airport information, airways, terminal and enroute waypoints, navigaids, holding and approach procedures, etc. This data, combined with information such as that pertaining to company routes and individual procedures, results in a specific database tailored to each customer's requirements.

## 产品介绍

该款航空导航数据，为飞行运行整合了相关导航数据、航线和飞行程序，并使其可用。其主要作用是作为一种已处理的FMS数据库文件，能够为航空器在飞行过程中，为飞行管理系统提供必要的数据库输入。除在航空器中使用外，该航空数据库也可用于飞机模拟机运行和飞行计划工具。

## 产品描述

通过EASA认证的导航数据库，支持几乎所有类型的FMS，涵盖所有已公布的商用机场，简易机场，直升机机场(+22'000)。产品客户群超过160家航空公司，其中包括汉莎航空、瑞士航空、英国航空、法航、阿联酋国际航空、泰国航空等，以及多家飞行计划和SIM运营商。

## Value Proposition / USPs Lido/FMS

### USPs

#### ■ Customer service

- 24/7 customer service: Assigned Customer Service Manager per customer
- Online access to customer database; possibility to edit company data

#### ■ Direct customer contact and product distribution

- Direct access to NavData producer / professional team of dedicated experts
- Problems solved 24/7 without delay over direct contact

#### ■ Airline operations experience

- Access to the instant feedback of thousands of pilots in worldwide flight operations. LSY staff has airline knowledge, FMS and consulting expertise of more than 160 airlines and their complex navigational requirements

#### ■ Highest data quality

- Systematic data maintenance combined with seamless data traceability fulfils highest quality requirements for state of the art PRNAV (precision navigation).
- Processes are compliant with EUROCAE ED-76/RTCA DO-200A, certified by EASA, and audited by major airlines.

#### ■ Tailored product

- Operational flexibility and optimal use of FMS onboard storage capacity over individual data / airport coverage for each database.

#### ■ Training classes in FMS NavDB Handling and Management

## 价值定位/独到之处 Lido/FMS

### 独到之处

#### ■ 客户服务

- 24小时客户服务: 客户经理一对一服务
- 在线访问客户数据库; 可对公司数据进行编辑

#### ■ 直接客户联系和产品分发

- 可直接联系导航数据制作者、或者由专家组成的专业团队
- 建立无延迟直接联系, 24小时为客户解决问题

#### ■ 航空公司运行经验

- 可获得全球飞行运行数以千计的飞行员快速反馈信息。汉莎系统的工作人员掌握了航空公司知识、FMS知识、超过160家航空公司的咨询经验, 以及这些公司复杂的导航要求。

#### ■ 最高级别的数据质量

- 集成无缝数据跟踪的系统化数据维护, 可满足为目前PRNAV最高等级数据质量要求。
- 加工处理符合EUROCAE ED-76/RTCA DO-200A, 通过了EASA认证, 也通过了多家大航空公司的审核。

#### ■ 客户化产品

- 根据个别数据/机场覆盖, 每一个数据库具备运行的灵活性, 并且实现机载FMS存储容量的最佳利用。
- 培训包含在FMS导航数据库的操作与管理中

## Deliverables for a Letters of Acceptance (LoA Type 1)

- Internal Audit Plan
- Data Maintenance & Tool Qualification Plan
- Data Configuration Management Plan
- Navigation Database Disaster Recovery Plan
- Training Manual
- ARINC 424 Extract File Specifications
- FMS Database Personnel & Duties
- DO-201A Accuracy and Assurance Level Reference
- ED\_76\_DO\_200A Change Process
- Glossary of Terms and Abbreviations
- Country FIR Description Codes
- Navigational Database Maintenance Manual
- Coding Practices
- Data Entity Capture and Maintenance
- Process Manual
- Data Quality Requirements Definition

The image shows a formal document from the European Aviation Safety Agency (EASA). It is a 'Letter of Acceptance Type 1' issued to Lufthansa Systems FlightNav Inc. The document is dated 2 August 2005. It states that the agency has investigated the company's procedures and found them to comply with the conditions for the issuance of Letters of Acceptance for Navigation Database Suppliers. The document is signed by Dr. N. Lohl for EASA. The background of the document features a large, stylized graphic of a white star on a blue background, which is the EASA logo.

European Aviation Safety Agency

**LETTER OF ACCEPTANCE TYPE 1**

REFERENCE: EASA.LOA.0003

The Agency has investigated

**Lufthansa Systems FlightNav Inc**

Stelzenstrasse 6-8  
Air Center, 5<sup>th</sup> Floor

## General Staff Training & Qualification

- Safety assessment prior to enrollment
- Partnerships with selected universities
- Collaborations with aeronautical training institutions
- Accredited fulltime trainers in-house
- Modular training concepts for all staff
- Human factors training for all staff
- Training acknowledgement through examinations
- Long term human resource planning

“By Airliners for Airliners”

## 一般人员培训及资质

- 入职前的安全评估
- 建立与选定大学的伙伴关系
- 建立与航空培训机构的合作
- 认可的全职内部培训教员
- 针对全体职员模块化培训概念
- 针对全体职员的人因培训
- 以考试来确认培训
- 长期人力资源规划

“By Airliners for Airliners”

## Update DataBase

- Check source correctness and completeness
- Resolve source conflicts
- Determine affected NavData Records
- Perform the data entry
- Resolve Nav Database conflicts
- FMS Application runs plausibility checks
- FMS Application ensures traceability and history

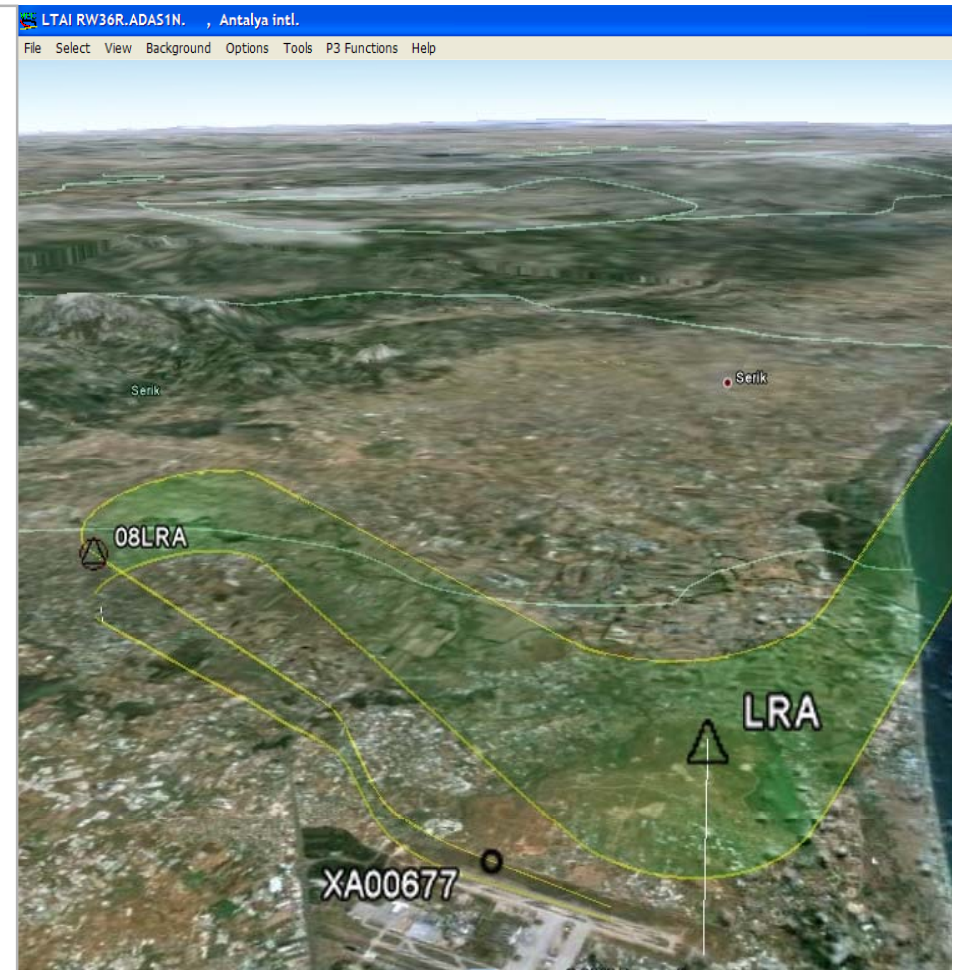

## DataBase Checks

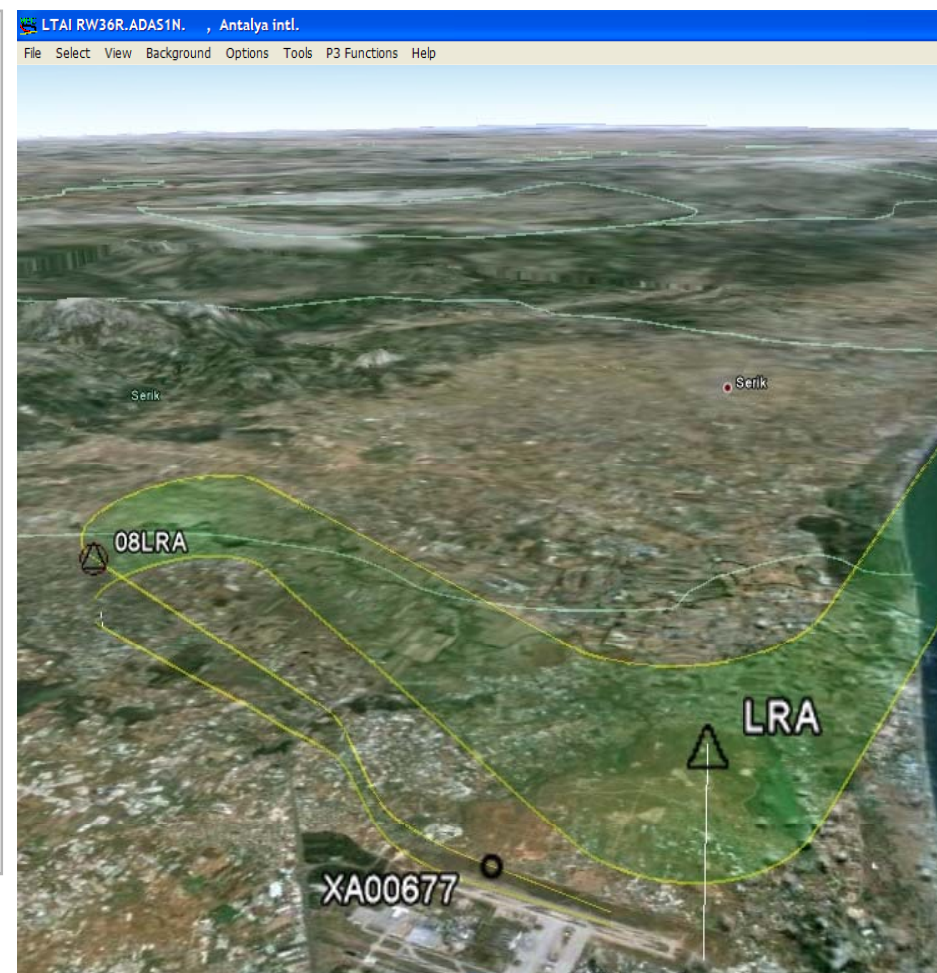

- Weekly Quality Check performed by the Director NavData Services and FMS Database Quality Engineers.
- External Visualization tool
- Batch Run Checks
- SQL Checks
- Runway Check
- Java Routes / Proc Checks
- Runway Crosscheck GE
- MSA-Check
- File Verification
- Data Base production and verification procedures are managed by the Cycle Run application ensuring consistency cycle per cycle

## 数据库检查

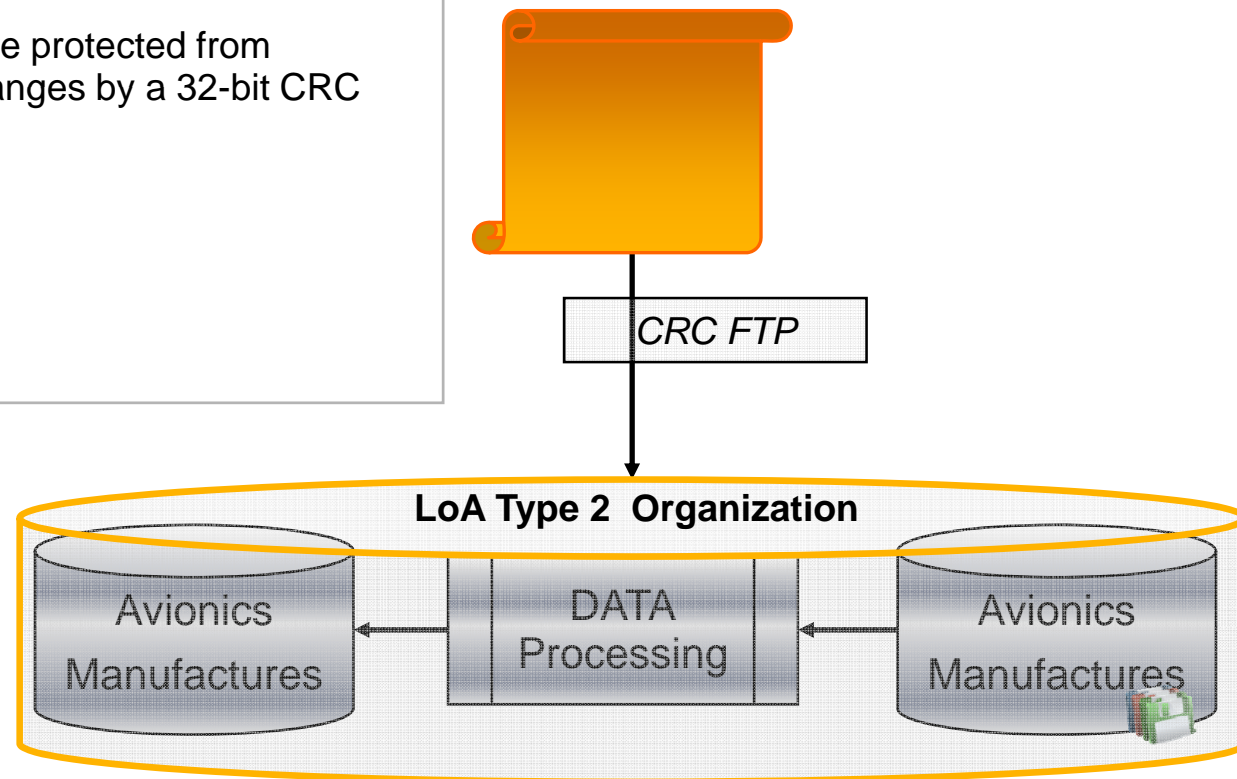

- 每周导航数据库服务主管和**FMS** 数据库质量工程师，都会进行质量检查
- 外部可视化工具
- 分批次运行检查
- 结构化查询语言(**SQL**)数据库检查
- 跑道检查
- **Java** 航路/程序检查
- 跑道交叉检查**GE**
- 最低安全高度 (**MSA**) 检查
- 文件核实
- 数据库制作和校验程序，都是由周期性运行应用软件来管理，以保证数据在每个周期里一致

## Delivery to OEM

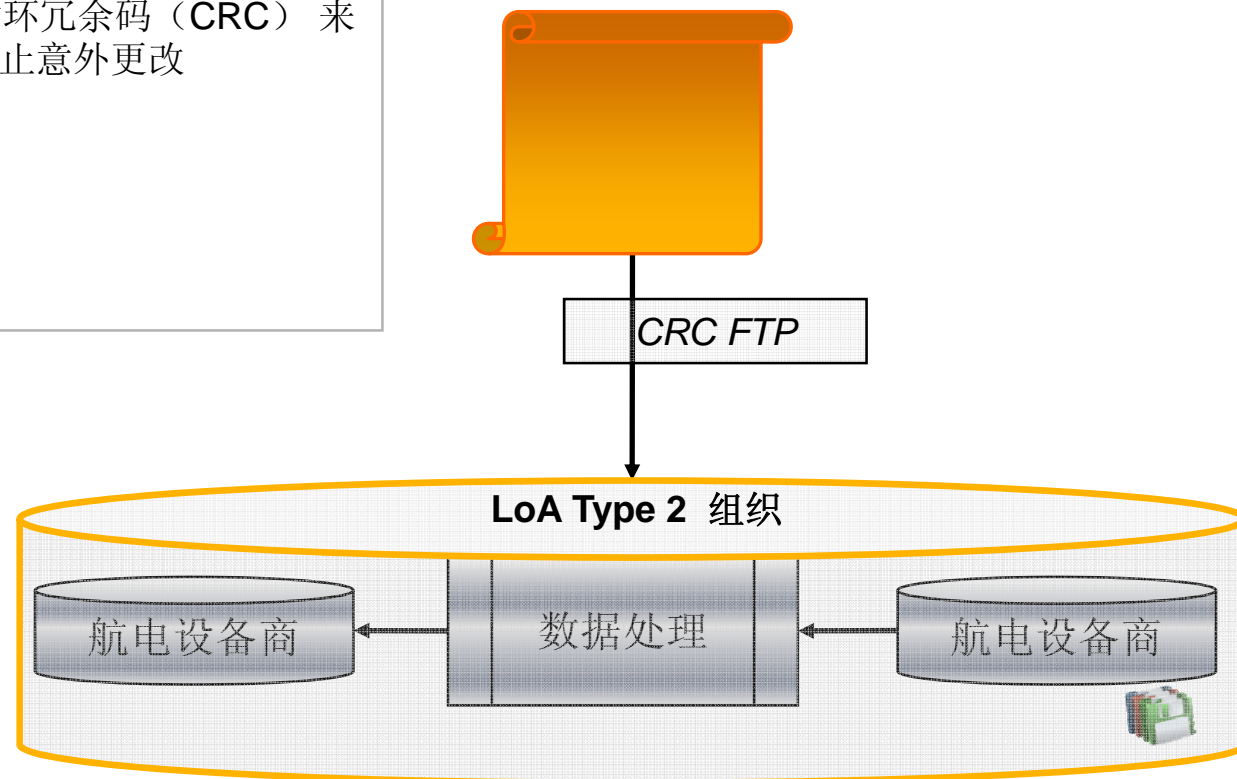

- Generation of ARINC 424 File
- Each extracted data file is transferred electronic using a standard FTP tool
- The data files are protected from unintentional changes by a 32-bit CRC integrity check

## 向OEM交付

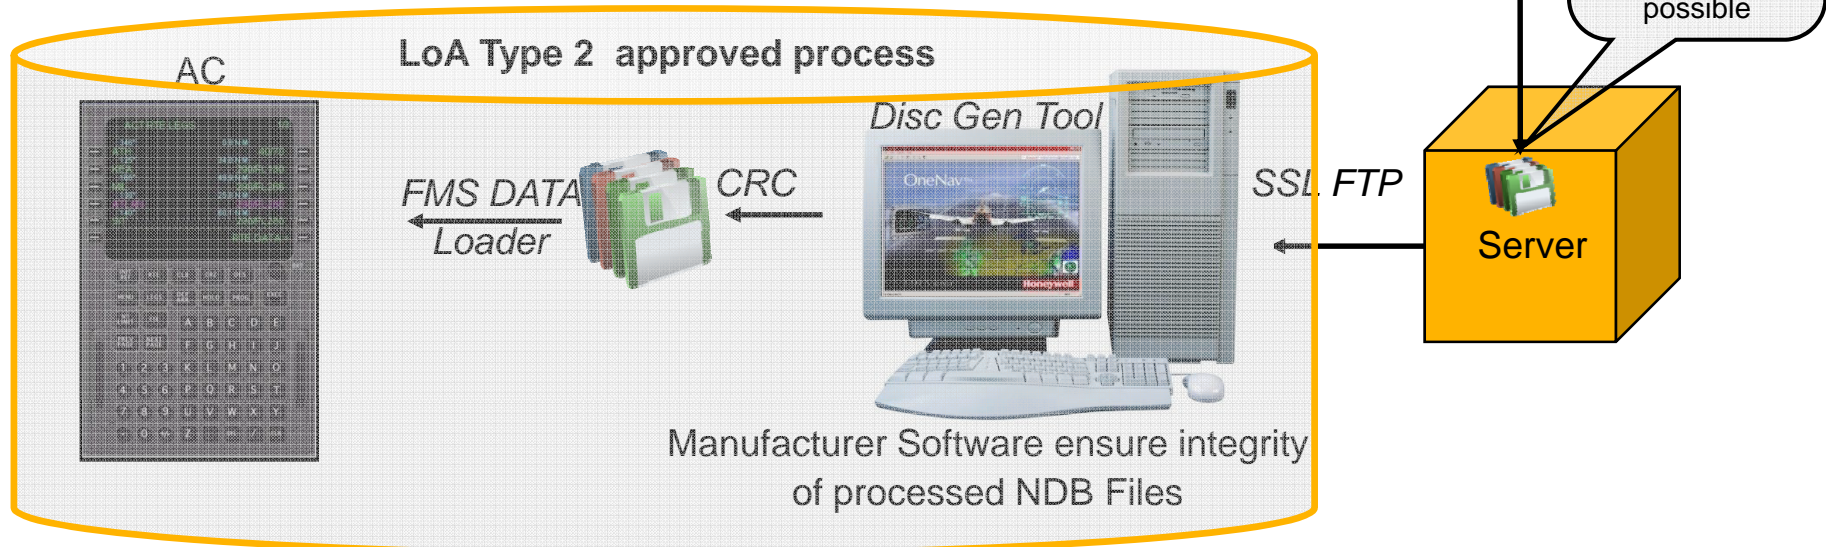

- ARINC 424 文件生成
- 每一个提取的数据文件，都采用标准的文件传输协议（FTP）工具来传输
- 数据文件采用32位循环冗余码（CRC）来进行完整性校验，防止意外更改

## Customer Delivery

- Processed Data Bases delivered by OEMs
- Each extracted data file is transferred electronic using a standard FTP tool
- The data files are protected from unintentional changes by a 32-bit CRC integrity check
- Delivery to Airlines

## 向客户交付

- 已处理后的数据库由**OEM**交付
- 每一个提取的数据文件，均采用标准的**FTP** 工具来传输
- 数据文件采用**32位CRC**来进行完整性校验，防止意外更改
- 交付给航空公司

## Total Quality Management (TQM)

### 1<sup>st</sup> level

A team of FMS professionals, trained & audited by internal and external experts.

### 2<sup>nd</sup> level

Worldwide AIP Monitoring → LSY Postoffice Tool ®

### 3<sup>rd</sup> level

Plausibility Check → LSY FMS Application ®

### 4<sup>th</sup> level

Validation / Double Checks

Four-Eye / Double-Signature policy for all editing of safety-relevant Database objects such as GPS-and RNAV-Procedures.

### 5<sup>th</sup> level

Ability to visualize procedures before and after processing.

## 总质量管理

### 第一层次

拥有一批在**FMS**方面的专业人员，他们已接受公司内部和外来专家培训并通过审核

### 第二层次

全球范围内的**AIP**监控 → **LSY Postoffice Tool** ®

### 第三层次

真实性检查 → **LSY FMS Application** ®

### 第四层次

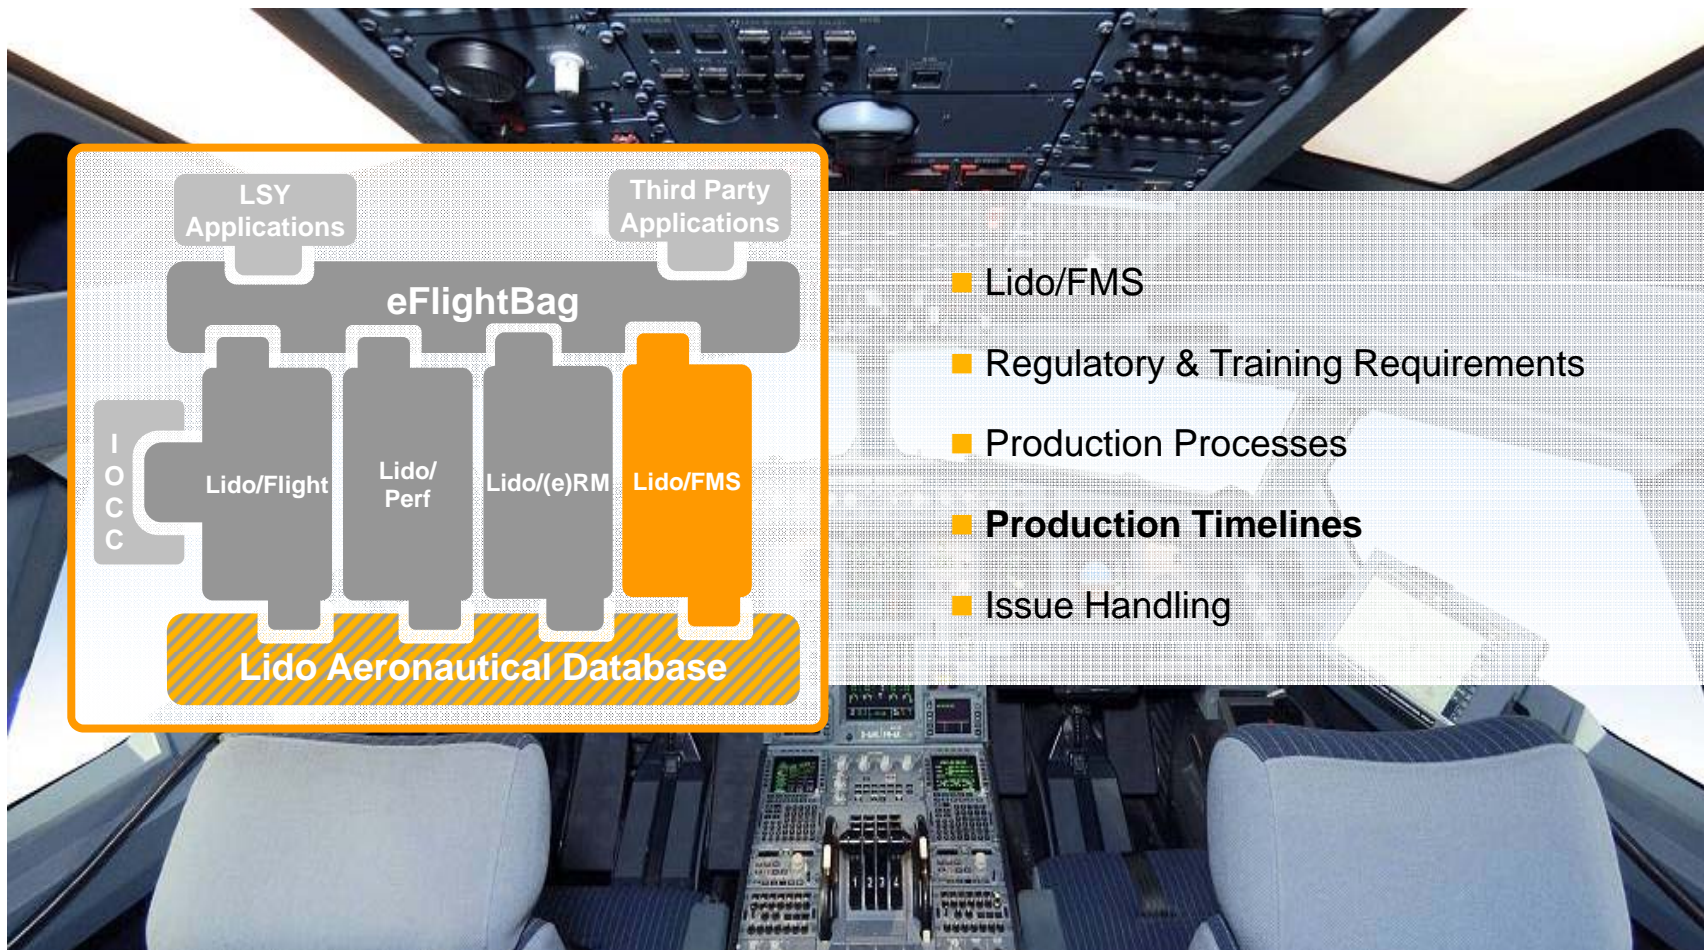

生效 / 双重检查

凡是涉及安全的数据库编辑，比如**GPS**和**RNAV**程序，均是双人/双签名制

### 第五层次

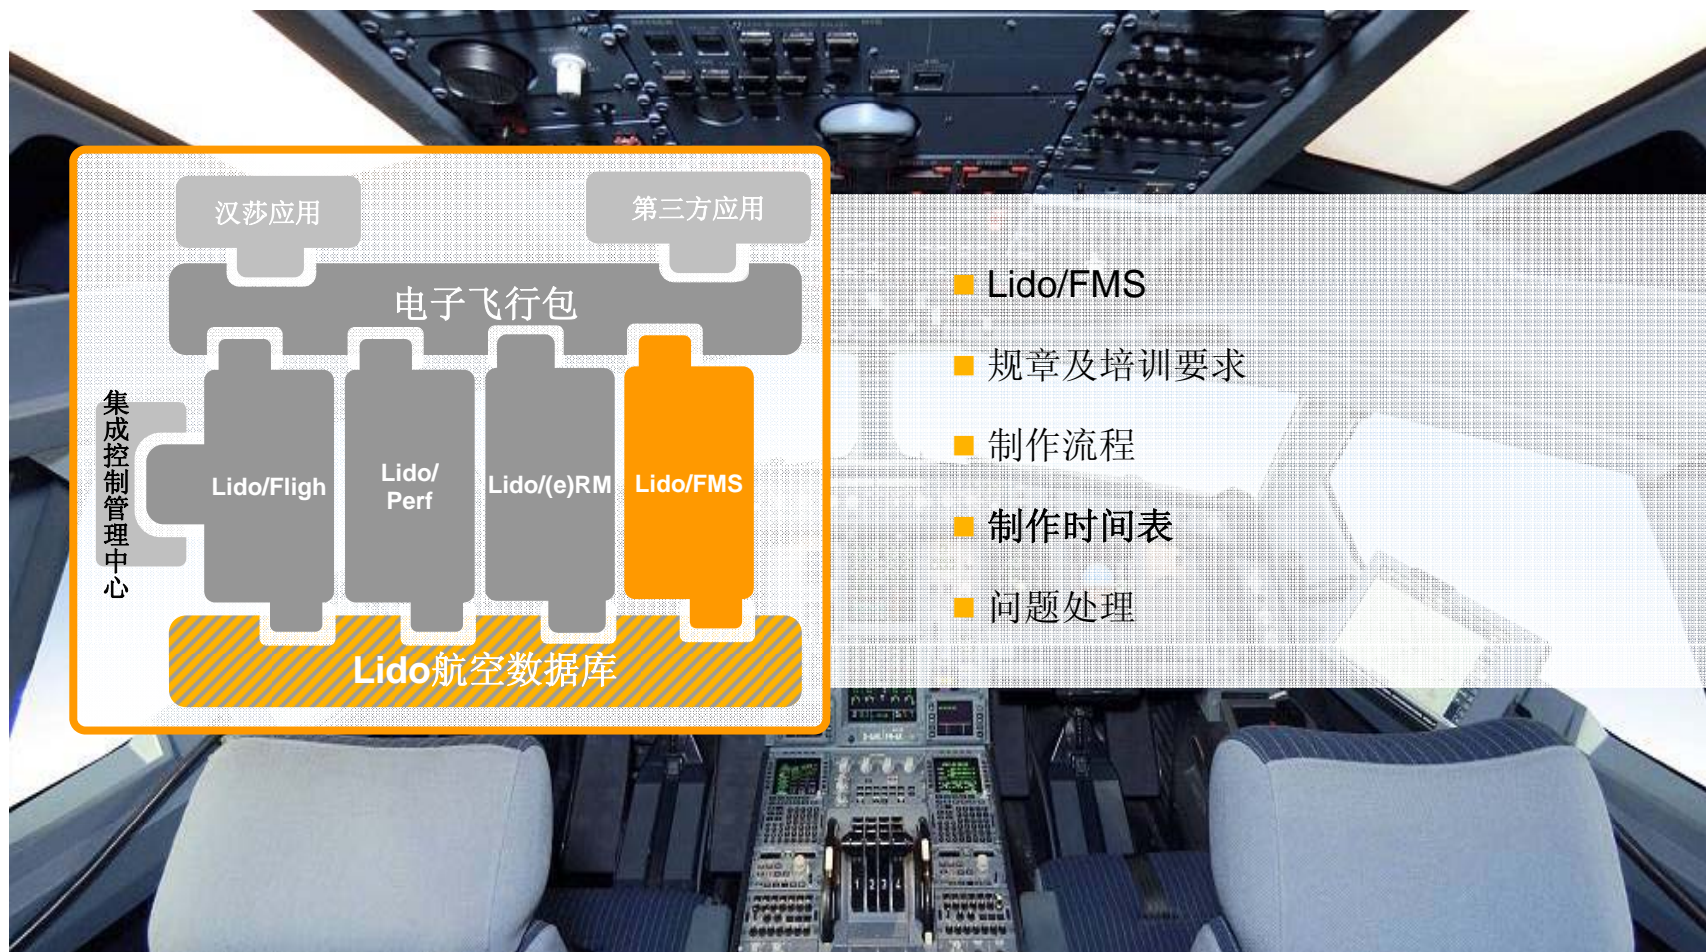

在处理前和处理后，都能对程序可视化
